Basic phones											
Basic Phones will have either no camera or a VGA camera. Basic phones may be candy bar, slider or flip style.											
Basic phones are capable of making and receiving calls, sending and receiving text messages and picture messaging.											
Wap browsing is also available											
Mid Level or Middle phones											
These phones generally have higher resolution cameras. They will have Bluetooth capability. Middle level phones will usually have a memory slot for storing pictures, video and music.											
Mid Level phones also have the ability to send and receive both text and picture messages.											
High End phones											
These devices will have Megapixel or better cameras. They generally have stereo Bluetooth. Most will have additional HTML style internet access. Capabilities											
Some phones in this category will run windows mobile software and have touch screens.
